EDUCATION

Java & Backend Development

[TechPro Academy](#)

📅 November 2024 - March 2025

BSc in Computer Science & Telecommunications

[University of Thessaly](#)

📅 October 2019 - November 2024

📍 Lamia, Greece

Pedagogical and Teaching Competence

[University of Thessaly](#)

📅 October 2021 - June 2024

📍 Lamia, Greece

PROJECTS

Fullstack E-shop Platform(Spring Boot & Next.js)

- Developed a fullstack e-commerce application using Spring Boot for the backend and Next.js for the frontend, following RESTful architecture principles.
- Implemented core business features including product management, user authentication, shopping cart and order handling.
- Designed secure backend APIs with role-based access control and JWT authentication.
- Integrated frontend with backend services, enabling dynamic data fetching, state management and responsive user experience.

Bachelor Thesis – Big Data Analytics in MOOCs

- Developed a predictive analytics model for student performance in MOOCs using machine learning.
- Implemented regression and classification models (Random Forest, Gradient Boosting, Logistic Regression).
- Utilized Python (Pandas, NumPy, Scikit-learn, TensorFlow, Matplotlib) for data processing and model evaluation.
- Designed ROC curves, error metrics (MSE, R^2 , Precision, AUC, F1 Score) for model assessment.

Java & Spring Boot Product Platform

- Developed a two-part backend system featuring a Java Servlet gateway and a Spring Boot REST API (ProductService), enabling full CRUD operations on product data.
- Integrated a PostgreSQL database with schema-based initialization, implemented Spring Security for endpoint protection, and provided RESTful endpoints with clear role separation and validation.
- Dockerized the application stack, including Spring Boot, PostgreSQL, and PgAdmin services, for portable, production-ready deployment with thorough documentation and tested API samples.

WORK EXPERIENCE

Beach Bar Supervisor

📅 2020 - 2024

📍 Ierissos, Chalkidiki, Greece

Freelancer

📅 October 2022 - November 2022

- Designed and developed a responsive e-commerce clothing store using PHP, MySQL, HTML, CSS and JavaScript
- Built core features including user authentication, shopping cart, product catalog, and an admin panel([more](#)).

LANGUAGES

- Greek (Native)
- English (B2 ESB, C2 LRN)
- German (A2 Goethe)
- Russian (Conversational)

TECH STACK

Back-End

- Java
- PHP
- SQL
- Spring Boot
- REST APIs

DevOps / Tools

- Git
- Docker
- Postman
- MongoDB

Front-End

- HTML
- CSS
- JavaScript

Frameworks & Libraries

- Bootstrap
- Node.js
- NumPy, Pandas
